

REMARKS

Enclosed herewith is a Substitute Specification in which the specification as filed has been amended in various places to correct typographical and grammatical errors, and to also add section headings. The specification as filed has also been amended to cite International (PCT) Patent Applications corresponding to and instead of the cited unpublished European patent applications.

Enclosed herewith is form PTO/SB/08A listing these International patent applications.

In support of the above, enclosed herewith is a copy of the specification as filed marked up with the above changes.

The undersigned attorney asserts that no new matter has been incorporated into the Substitute Specification.

Applicants believe that the above changes answer the Examiner's objection to the Abstract and the specification, and respectfully request withdrawal thereof.

Applicant believes that this application, containing claims 1-14, is now in condition for allowance and such action is respectfully requested.

Respectfully submitted,

by /Edward W. Goodman/
